

GWireless is a secure wireless network that uses an authentication method that works with a variety of computers, Apple iOS mobile devices and a variety of Android devices. GWireless automatically connects devices to the Internet, and once users are connected, they will not have to log in to the system again.

Windows and Mac:

1. Ensure the wireless functionality of your computer is enabled.
2. Select GWireless from your list of available networks.
3. Enter your GW NetID (the first part of your email address that precedes the @ sign) and corresponding password.
4. Select Connect/OK.
 - a. If you are prompted for “gwise.it.gwu.edu” please accept or trust the certificate. See this page for more details.

NOTE: The certificate will show as “Not Trusted” because it’s a GWU-generated local certificate and only valid for GW resources. Please accept as long as you see gwise.it.gwu.edu.

iPhone and iPad:

1. Click on Settings on the home screen of your iPhone.
2. Click on Wi-Fi.
3. Select GWireless from your list of available networks under Choose a Network.
4. Enter your NetID (the first part of your email address that precedes the @sign).
5. Enter your NetID password.
 - a. If you are prompted for “gwise.it.gwu.edu” please accept or trust the certificate.

NOTE: The certificate will show as “Not Trusted” because it’s a GWU-generated local certificate and only valid for GW resources. Please accept as long as you see gwise.it.gwu.edu.

Android phones and Chromebooks:

1. Enable the wireless service on your device.
2. Select “GWireless” from your list of available networks.
3. Select PEAP for the EAP method.
4. Select MSCHAPV2 for Phase 2 authentication.
5. Enter gwu.edu for the Domain (if present).
6. Enter your NetID (information before the @ symbol in your GW email address) for your identity.

7. Ignore the Anonymous identity field.
8. Enter your NetID password.
 - a. If you are prompted for “gwise.it.gwu.edu” please accept or trust the certificate. See this page for more details.

NOTE: The certificate will show as “Not Trusted” because it’s a GWU-generated local certificate and only valid for GW resources. Please accept as long as you see gwise.it.gwu.edu.

Note: Selecting the right network for GW Students:

Device	Network	Network Type
Microsoft Windows, Apple OS X, Android, Apple iOS, Chromebook	GWireless	Wireless
Roku, AppleTV, Playstation, Xbox, Nintendo Switch, Amazon Fire TV Stick	GWConnect	Wireless
Devices requiring ethernet connection, and devices not covered by GWireless or GWConnect (gaming/streaming console)	GWired	Ethernet (Wired)
